

# The J.Vardhan Lion

Theme, colours and full design system are being reworked separately — **this brief is only about the lion**. Mark drawn flat in gold #CFAA6D; must sit on both warm ivory and deep green (every specimen below is shown on the split ground).

## PRIORITY DIRECTION — THE LION FACE

MASTER EMBLEM — REFINE THIS

### Floral-mane face: keep the idea, refine the drawing

- The mane made of **marigolds + mogra buds** is our most ownable idea — the family are flower people. Keep it.
- Redraw as clean vector: **max 8 large flower shapes**, no tiny petals that clog when small.
- Face calm and dignified, **ear visible** (Asiatic lions have short manes — the floral ruff stays contained, never a big round African mane).
- Simple almond eye, clean nose wedge, closed mouth — no whisker dots.

### Face variants worth sketching

- Same face with a **plain short mane** (no flowers) — quieter corporate version
- Face inside a **plain double-ring roundel** for stamps/avatars
- **Line-art only** version (no solid fills) for foil/embroidery

## EVERYTHING EXPLORED SO FAR

V0 DRAFT

### Walking Monoline

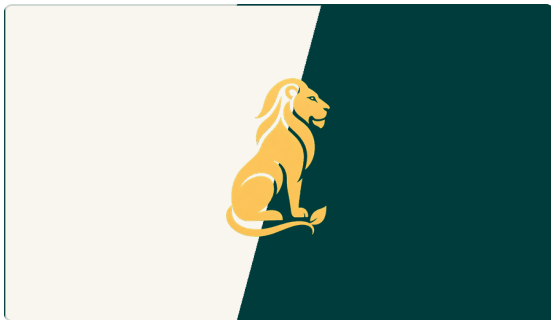

Elegant line rhythm but generic pose and thin strokes. Useful only as a line-weight reference.

MASTER — PAGE 1

### Floral-Mane Face

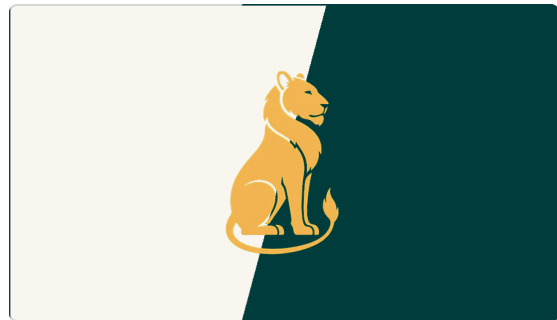

The keeper. Currently the website hero mark; needs the vector refinement described on page 1.

EXPLORED

### Guardian — Flowing Mane

Right solidity, wrong mane (too African). Superseded by the short-mane version.

SMALL-SIZE ICON

### Guardian — Short Mane

Cleanest at 32px; current favicon. Refine: calmer muzzle, 3-shape ruff, tail ending in a leaf-shaped tuft.

## STANDING LIONS — POSES TO EXPLORE FRESH

### Standing four-square

All four feet planted, head high, side profile — steady guardian at a gateway. Solid-shape style like the seated icon.

### Walking, head high

The V0 pose redrawn properly: bold monoline, Asiatic anatomy, strokes thick enough to embroider.

### Standing beneath a toran

Small lion under a slender toran archway — we build wedding gateways; the lion guards ours.

- **Asiatic (Gir) anatomy always:** short sparse mane, ears visible, one belly-fold line, lean body, tail tuft (leaf-shaped tuft welcome)
- Calm and dignified — never roaring, never hunting
- Flat colour, consistent stroke logic, survives one-colour print and 24px
- No crowns, shields, laurels, heraldry
- No gems, gradients, gold-foil shine, 3D
- Not the Gujarat Tourism lion; run a trademark/reverse-image check before finalising

Vector sources (AI/SVG) + gold, teal, reversed and single-black versions of each final. Live context: [mihirzalavadia.github.io/jvardhan-site](https://mihirzalavadia.github.io/jvardhan-site)
